RE: First Public Forum for Community Input on Future Calendar Development

In developing the calendar process for working with the SBTA/CSEA Negotiation Teams, I requested that the Board hold two public forums to solicit feedback and input from the community regarding our calendar(s) for the elementary and secondary schools. The current calendars are only in place for one more year (2006-2007). Therefore, we must begin the process now for developing school calendars for the 2007-08 and subsequent school years. This is the first of two forums to be held for public input. Any feedback and input presented would be valuable information for the District and SBTA/CSEA Negotiation Teams to have when beginning to work on the school calendar(s).

Please let me know if you should need any further information regarding this request.
